

Chipfix Repair System
Part no. 00.1100

Chipfix from HBC system provides

For the first time a stand-alone system and fast, low cost option for the repair of stone-chips and minor paint damage, scuffs and scratches on motor vehicles.

Combining unique new technology with specialist training Chipfix produces a deep fill, quick shine, fast dry repair and refinish within minutes.

The system allows deeper stone chip damage to be built upon to achieve the desired level of fill and make the repair optically almost undetectable.

HBC system®

Chipfix Repair system

For the repair of scratches
and or stonechips
on all types of vehicles

Chipfix produces a deep fill,
quick shine, fast dry repair
and refinish within minutes.

Chipfix produces a deep fill, quick shine, fast dry repair and refinish within minutes.

Manufacturers, dealers, bodyshops, car wash, mobile operators are increasingly concentrating on the provision of higher 'value added' or 'sell up' services.

HBC invests heavily in Research and Development to ensure its place as market leader and to guarantee ongoing innovation in the sector.

After intensive market and product evaluation and to compliment the comprehensive product range already in the market, HBC is now launching Chipfix Paint Repair technology systems.

Chip Fix system is a 1K system with huge benefits over existing systems available.

UV-A1

Spot Repair system

A Spot repair from start till finish within 33 minutes including curing time, even if the repair needs filler! It sounds too good to be true, but this is now achievable with the NEW and unique HBC UV-A1 Spot repair system.

- Extremely fast curing times for improved repair times
- Tried and tested new system delivers improved efficiency and profitability
- Can be used on all types of materials in and outside the vehicle
- Fewer preparation steps
- Less waste product
- Low material usage
- Increased productivity and profitability
- No mixing required
- Safe UVA curing with no health & safety risk
- Also available for the first time in Aerosol format

33MINUTES SPOT REPAIR!

Fast, clean, easy to use and safe
for either aerosol or spraygun.

Traditional Spot repairs can take between 45-60 minutes, excluding curing time. Larger repairs which need filling can take even longer!

UV-A1 Spot Repair System

cures within 3-4 minutes
- 1K UV-A1 Thinner
for blending
- 1K UV-A1 Filler
cures within 3-4 minutes
- 1K UV-A1 Filler- Primer
cures within 3-4 minutes
- UV-A1 Ultraviolet refinishing lamp

HBC System now offers a revolutionary new technology called GlassCoat. It is a ceramic glass resin, that when applied to your paint provides a permanent bond that protects and guarantees your vehicle's finish from environmental conditions not covered by the manufacturer's warranty.

GlassCoat

Paint Protection

GlassCoat is a clear liquid that is applied to the clearcoat of your vehicle. Unlike traditional waxes and sealants that simply "coat the surface", GlassCoat polymerizes and crosslinks onto the surface of the clear-coat. The end result is a clear and extremely durable ceramic film that adheres so strongly to the surface that not even organic solvents can remove it.

Easy to apply paint protection which protects paint finishes against damage from machine car washes, acid rain and bird lyme for up to a 7 year period!

HBC system®

the perfect start to an excellent finish
