

# Brilliance Film FC 164-Longlife, VEL

Aluminium oxide abrasive film, velour backed with active additives

## Product Benefits

- The new film backing combines the advantages of cloth (high edge stability & tear resistancy) and paper types (high flexibility and lower weight)
- Uniform grain orientation means perfect surfaces
- Semi-open grain coating and optimized long-life coating prevent premature clogging and guarantees a long tool life at constant removal rates
- For quick identification, the grit size can be read on the grain side
- Using discs with MultiHole system means longer tool life and better surface qualities due to continuous, full-surface dust extraction and low sanding temperatures

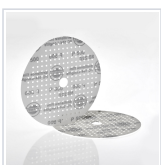

## Applications

- Especially for the treatment of lacquered surfaces on car bodies and attachments (KTL, filler, topcoat, as well as on plastic and lacquered wooden materials)
- Sanding of wooden materials, filler, fiber composites and gelcoat (for example: wind power propellers, yachts, motor boats, aircraft, vehicle bodies)
- Sanding machines: Random orbital sanders, angle grinders, triangular and orbital sanders

## Product Structure

<b>Type</b>	16477
<b>Grain</b>	Aluminium oxide
<b>Bonding</b>	Resin, coated with additives
<b>Backing</b>	Film, velour-backed
<b>Coating</b>	half-open
<b>Grit range</b>	P 240 - P 2000

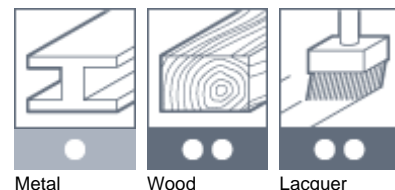

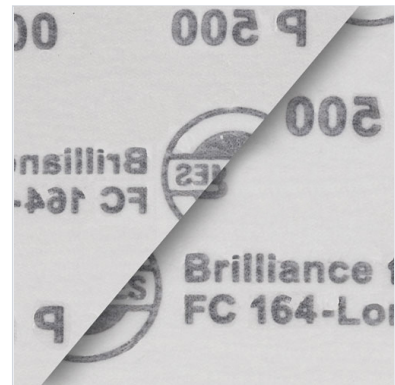

## Forms of Delivery

Discs
